Hello, Adam. Attached are the photos and scope of work related to the asphalt paving repair and collapsed drainage structure at Ashe County High School that I shared with you last week. The total cost for this work is **\$27,112.91**.

We would like to request approval to use a portion of the remaining funds from the county-allocated chiller project to complete these repairs. As you may recall, we realized a savings of **\$363,860** from the original chiller allocation. From that amount, **\$61,060** was previously appropriated for the MVES drain/sinkhole project, leaving just over **\$300,000** remaining.

We respectfully request that the county appropriate **\$27,112.91** from those remaining funds to address the paving repairs and collapsed drainage structure at the high school.

These repairs are important to ensure safe access and prevent further deterioration of the affected area in the bus parking lot behind the high school. We appreciate your continued partnership and thoughtful consideration of this request.

Please let me know if you need any additional documentation or information.

**Dr. Eisa M. Cox**  
**Superintendent**
